Canine & Feline Product Guide

From the leader in omega-3s

Nordic Naturals Leads the Pack in Pet Health

Pet Health Starts with Omega-3s

Nordic Naturals loves pets. That's why our pet products are made from the same top-quality omega oils used to make our award-winning products for humans. We take great pride in crafting safe and nutritious omega-3 fish oils specially for dogs and cats.

Pet Health & Omega-3 Nutrition

The omega-3 fatty acids EPA and DHA are important for pet companions. Since dogs and cats cannot easily make these fats, the only viable source of EPA and DHA is through their diets or through supplementation. Unfortunately, commercial pet foods, whether dry, canned, or raw, typically contain higher amounts of omega-6 fatty acids from meat products and vegetable oils. This can result in a fatty acid imbalance that is problematic for pet health, just as it is for humans who get too much omega-6 and not enough omega-3. Supplementation with triglyceride-form omega-3 fish oil can help achieve a more balanced ratio of omega-3 to omega-6 fatty acids, in a molecular form that has been shown to support optimal absorption.

Daily supplementation with omega-3 fatty acids helps support optimal pet health in a number of ways, with each of the two major fats performing distinct yet mutually supportive roles. EPA supports cellular health, immune system health, skin and coat health, joint health, and heart and kidney health. DHA supports cellular health, along with a healthy immune system, development and maintenance of the brain and eyes, and puppy trainability. Together these nutrients work to provide a meaningful foundation for lasting pet health.

The Name You Can Trust

Since 1995, Nordic Naturals has been the benchmark for high-quality omega-3 fish oil. We manage every step of fish oil production, using hexane-free, oxygen-free, and reduced-heat processing to yield industry-leading purity and freshness. Our fish oil products are more powerful naturally, with triglyceride-form omega-3s—the same molecular form in which these fats exist in wild fish—to ensure optimal absorption and results.

Why Choose Nordic Naturals

Health

We're committed to delivering the world's safest, most effective nutrients for optimal health.

Sustainability

All of our fish oils come from 100% wild-caught, sustainably sourced fish rich in omega-3s.

Freshness

All of our fish oils are processed in an oxygen-free environment to prevent rancidity. This ensures a great taste with no fishy burps or odor.

Quality

All of our fish oils are provided in the natural and most effectively absorbed triglyceride (TG) form.

Purity

All of our products are third-party tested to ensure their purity and freshness. Certificates of analysis are available for any of our products.

Research

Our products are supported and backed by more original research (50+) than any other brand.

Commitment to a Healthy Planet

100% Biofuel

Our processing plant in Arctic Norway is powered 100% by biofuel using leftover fats from our fish oil processing.

Protect the Sea

We only source non-endangered, wild-caught species. We also only work with fisheries that are certified sustainable by Friend of the Sea.

Non-GMO

We have always been committed to using only non-GMO ingredients in our products.

Reduce Waste

All of our product containers and packaging materials are recyclable. We also use recyclable packaging whenever possible in the shipping of our products.

Sustainable

Our headquarters in Watsonville, California was awarded the LEED Gold Certification for our whole-building approach to sustainability.

Cause Partners

We support organizations that do good and are focused on improving the health of people and our planet.

Omega-3 Pet™

2 Fluid Ounces • SKU 50505
8 Fluid Ounces • SKU 50504
16 Fluid Ounces • SKU 50506

Safely provides the daily omega-3s your dog or cat needs to live an active, happy life

Omega-3 Pet is made exclusively from sustainably-sourced sardines and anchovies. This award-winning formula gives dogs and cats the daily serving of omega-3s EPA and DHA they need to live active, happy lives. Omega-3 Pet does not contain rosemary oil, or flavorings, in order to ensure the safety of pets.

- Supports brain and eye development and maintenance
- Supports heart, skin, coat, and joint health
- Safe for dogs and cats

Guaranteed Analysis

1 teaspoon = 5.0 mL (4600 mg)
1 teaspoon contains:
 Crude fat (min.)99.4%
 Moisture (max.)0.1%
 Total Omega-3 Fatty Acids* (min.)3.1%
 Eicosapentaenoic Acid (EPA)* (min.)1.7%
 Docosahexaenoic Acid (DHA)* (min.)1.0%
 * Not recognized as an essential nutrient by the AAFCO Dog or Cat Food Nutrient Profiles.
Ingredients: anchovy oil, sardine oil, d-alpha tocopherol (a preservative).

Suggested daily use for cats

2-4 lbs. • 0.25 mL • 37 mg EPA/25 mg DHA
 5-9 lbs. • 0.5 mL • 74 mg EPA/51 mg DHA
 10-14 lbs. • 0.75 mL • 110 mg EPA/76 mg DHA
 15-20 lbs. • 1.0 mL • 147 mg EPA/101 mg DHA
 20+ lbs. • 1.25 mL • 184 mg EPA/127 mg DHA

Suggested daily use for dogs

2-4 lbs. • 0.5 mL • 74 mg EPA/51 mg DHA
 5-9 lbs. • 1.0 mL • 147 mg EPA/101 mg DHA
 10-19 lbs. • 2.0 mL • 294 mg EPA/202 mg DHA
 20-39 lbs. • 0.5 teaspoon (2.5 mL) • 368 mg EPA/253 mg DHA
 40-59 lbs. • 1.0 teaspoon (5.0 mL) • 736 mg EPA/506 mg DHA
 60-79 lbs. • 1.5 teaspoon (7.5 mL) • 1104 mg EPA/759 mg DHA
 80-110 lbs. • 2 teaspoon (10 mL) • 1472 mg EPA/1012 mg DHA
 111+ lbs. • 2.5 teaspoon (12.5 mL) • 1840 mg EPA/1265 mg DHA

Apply oil onto food, or serve by itself.

Do not exceed the suggested daily use without consulting your veterinarian.

2 oz: Calorie Content (Calculated) ME 8466 kcal/kg, 8 kcal/mL

8 & 16 oz: Calorie Content (Calculated) ME 8466 kcal/kg, 39 kcal/tsp

No artificial colors or flavors

Fatty acid in triglyceride form

Consult your veterinarian if your pet has a chronic illness, is on any medication, is fed a special diet or given any other nutritional supplements before using this product. Inform your veterinarian that your pet is receiving this product before any anticipated surgery. Consult your veterinarian in cases of accidental ingestion.

Keep out of the reach of children and pets

Leading the Industry with Superior Manufacturing

The Proof Is in the Test Results

Guaranteed Freshness

Freshness, which ensures product integrity and biological efficacy, may be the single most important quality of fish oils. Freshness prevents free radical formation which may have a negative effect on health. The main indicator of freshness is peroxide value (PV), a measure of current oxidation. A second important marker is anisidine value (AV), a measure of past oxidation. The lower these values, the fresher the fish oil. The measurement of the total oxidation of the oil is referred to as "TOTOX."

Exceptional Purity

Our meticulous quality control procedures begin in the ocean with our careful choice of fish species that are naturally low in toxins and high in omega-3 fats. Sourced from some of the cleanest waters in the world, our raw material is tested for heavy metals and other environmental contaminants. Analysis is based on the toxicity equivalent testing methodology established by the World Health Organization.

Request a Certificate of Analysis

We believe transparency in supplement manufacturing is critical to health and safety. To verify our leading purity and freshness levels, every product is tested by third-party, certified laboratories.

To receive a Certificate of Analysis for any Nordic Naturals product, visit nordicnaturals.com/cofa/ and enter your lot number.
